# WILEY X<sup>®</sup>

## *GO* / *CONFIDENTLY*

---

Wiley X was established in 1987 by U.S. Veteran Myles Freeman Sr. with a focused determination to create the world's best protective gear for those that protect our country.

As pioneers in protective eyewear, we believe there is a singular way to make gear for the world's harshest environments. Decades of innovation and design refinement have taught us that you never cut corners. You take care of those you're supposed to protect. You stand behind your promises. You constantly innovate. And you don't let up. Ever. That's the only way to make sure that our products continue to inspire confidence in everyone that wears them. Regardless of the situation. In spite of whatever they encounter.

We've built our company, our brand and our reputation by creating products that deliver uncompromising protection, and we always will. Go Confidently.

# TECHNOLOGY

---

Wiley X premium protective eyewear use the world's most durable and lightweight materials: shatterproof Selenite™ polycarbonate lenses with scratch-resistant T-Shell™ hardcoat and virtually indestructible Triloid™ nylon frames.

Wiley X: the only premium eyewear brand whose entire line is ANSI and EN.166 safety tested.

## VISUALIZING THE LIGHT SPECTRUM

THE HUMAN EYE CANNOT SEE THE ENTIRE LIGHT SPECTRUM. SOME AREAS ARE TOO DIFFICULT FOR YOUR EYE TO SEE CLEARLY, WHILE OTHERS ARE MUCH TOO DANGEROUS FOR YOUR EYES' HEALTH. CAPTIVATE™ POLARIZED LENSES FILTER OUT THE HARMFUL RAYS, AS WELL AS LIGHT THAT CONFUSES THE EYE, INCREASING CLARITY AND DEFINITION WITH VIBRANT CONTRAST AND VIVID DETAIL.

## CAPTIVATE™ POLARIZED INNOVATIVE LENS TECHNOLOGY

CAPTIVATE™ is a polarized patented lens technology from Wiley X that redefines color by filtering out harmful UV/Blue Light (HEV). It is the only independently tested polarized technology on the market.

CAPTIVATE™ Polarized lenses filter light, revealing vivid detail, vibrant contrast and optimal clarity. When testing the Wiley X CAPTIVATE™ Polarized lenses against competing eyewear, independent labs found CAPTIVATE™ Polarized lenses to either match or outperform the competition in every chromatic test. To reiterate, we do not come in 2nd to any of our competitors' CE lenses.

CAPTIVATE™ Polarized eyewear is the only contrast enhancing eyewear that meet the EN.166 and ANSI Z87.1 safety standards. While other companies focus on either the functionality or style of eyewear, we manage to deliver a product that is stylish on the outside and mind blowing from the inside. **CAPTIVATE™ DOES NOT ONLY REDEFINE COLOR, IT SETS THE BAR FOR WHAT SUNGLASSES CAN BE.**

### COLOR SPECTRUM WITHOUT CAPTIVATE™ POLARIZED

Our eyes can easily distinguish the blue, green, and red wavelengths along the visible light spectrum. However, it's where the blue, green, and red wavelengths merge together that the human eye has a difficult time seeing clearly.

### COLOR SPECTRUM WITH CAPTIVATE™ POLARIZED

CAPTIVATE™ Polarized lenses filter out the confusing light and make the color spectrum clearer for the eye. The results are increased contrast and greater clarity.

## CAPTIVATE™ POLARIZED LIGHT SPECTRUM

This chart shows the peak chromatic response for the colors blue, green, and red.

- Shaded zones represent the areas where light waves merge and confuse the eyes. This is where it is best to filter out light.
- Think of the shaded areas as confusing light and the non-shaded areas as clear light.
- CAPTIVATE™ Polarized blocks out the UV and bad blue light (HEV) (380nm-430nm) – rays of light that are harmful to our eyes, reducing the risk of damage to retinal cells and age-related macular degeneration.

The visible light spectrum is the segment of the electromagnetic spectrum that the human eye can view. More simply, this range of wavelengths is called visible light. Typically, the human eye can detect wavelengths from 380 to 700 nanometers.

HEV - High Energy Visible Light, UV - Ultraviolet Light, IR - Infrared Light ©ZEISS 2017

## BENEFITS OF CAPTIVATE™

### ENHANCED COLOR

CAPTIVATE™ Polarized filters out the confusing light where blue merges with green (500nm) and green merges with red (585nm). This allows more light where it is easier for your eyes to see, resulting in enhanced blues, greens and reds for a true color experience.

### GREATER CLARITY

Blue light with shorter wavelengths and higher frequencies scatter light and create haze. By filtering out this bad blue light (HEV), CAPTIVATE™ Polarized removes the haze and allows distant objects to be seen more clearly.

### INCREASED ALERTNESS / ELEVATED MOOD

CAPTIVATE™ Polarized lenses allow the beneficial side of blue light (HEV) – blue-turquoise rays – to be seen. This helps maintain the body's Circadian biological clock and the sleep/wake cycle. This beneficial blue light (HEV) also boosts alertness, helps memory and elevates mood.

### INCREASED CONTRAST

CAPTIVATE™ Polarized technology is offered in a variety of lens tint options, so you can fine-tune your experience, based on the specific needs of your environment.

### BETTER DEPTH PERCEPTION

By eliminating the bad blue light (HEV) haze while separating and enhancing colors in the visual spectrum, CAPTIVATE™ Polarized lenses will enhance depth perception.

### BLOCKS UV AND BAD BLUE LIGHT

CAPTIVATE™ Polarized blocks the UV/blue light rays that are harmful to our eyes. It is important to remember that spending one hour outside on a normal overcast day exposes our eyes up to at least 30 times more blue light than spending one hour inside, sitting in front of a screen. Wiley X CAPTIVATE™ Polarized is the only premium polarized eyewear brand that blocks out all bad blue light (HEV) up to 430NM.

## OLEOPHOBIC COATING

Wiley X utilizes a proprietary oleophobic coating on all CAPTIVATE™ Polarized lenses to create a smoother lens surface, which helps to keep dust, dirt, oil, snow and water from sticking to the lens. This in turn helps prevent smudging and water spots, making the lenses much easier to clean than an uncoated, standard lens.

## SCRATCH/ABRASION RESISTANCE

CAPTIVATE™ Polarized lenses achieve a Bayer 7 rating for scratch resistance. A rating of 4 or higher equates to a premium coating.

### WHAT IS THE BAYER ABRASION TEST?\*

The Bayer test is one of the most often cited test methods for abrasion resistance. This test subjects both a coated lens and an uncoated lens to abrasion from oscillating “sand.” The tray is reciprocated in a back-and-forth (to-and-from) motion a distance of 10 cm. (4 inches), at 150 cycles per minute for 4 minutes.

After this the haze gain is measured on both lenses. The ratio of haze gain of the uncoated lens to the coated lens is the Bayer Ratio. A Bayer Ratio of “1” means that the coating has equivalent abrasion resistance to uncoated lens. A Bayer Ratio of “7” means that the uncoated standard lens had seven times the haze gain as the coated lens. A common standard Bayer Ratio equal to “4” or greater is considered by the industry to be a premium coating.

\*November 2011, Testing Scratch Resistant and AR Lenses

## ANSI HIGH VELOCITY IMPACT/V0 BALLISTIC TESTS

When tested, the spectacles and goggles, including their lenses, must withstand different kind of impact depending on the different test standards specifications:

HIGH VELOCITY AND BALLISTIC IMPACT	SPECTACLES	GOGGLES
ANSI Z87km/h	6,35 mm diameter steel ball fired at 165 km/h	6,35 mm diameter steel ball fired at 274 km/h
MIL-PRF-32432	0,15 caliber projectile fired at 702-724 km/h	0,22 caliber projectile fired at 604-614 km/h
MIL-PRF-32432A	0,15 caliber projectile fired at 786-796 km/h	0,22 caliber projectile fired at 636-647 km/h

## ANSI HIGH MASS IMPACT TEST

Wiley X ANSI tested frames and lenses must withstand the weight of a 500 grams pointed projectile dropped from a height of 127 cm. This test pretty much ensures that they will stand up to anything you will encounter.

## EN.166 TEST STANDARDS

### EN.166S (SAFETY GLASSES):

Frame and lens must withstand the impact of a 22 mm steel ball weighing 43 grams dropped from 1,3 meters at a speed of 18 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

### EN.166F (SAFETY GLASSES):

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 162 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

### EN.166B (SAFETY GOGGLES):

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 432 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

## CAMO & OUTDOOR PATTERNS

Kryptek® provides combat proven features and designs in ultra high-performance technical and tactical outdoor adventure apparel. Kryptek® products are continuously tested and proven in austere combat environments and extreme hunting conditions. Constant improvements and feedback are implemented into future designs with the end-goal of providing products to outdoor adventurers who demand the utmost quality and overall performance in their gear.

### KRYPTTEK® NEPTUNE™

A predator lurks just below the surface. He is a shadowy figure gliding silently through the depths or perhaps a hidden entity patiently waiting in vigil on the ocean floor. His advantage is stealth and his attacks are sudden. He is the ruler of his domain.

### KRYPTTEK® HIGHLANDER™

Specially designed for those geographical regions and elevations that are varied. Kryptek® Highlander® increases stealth when pursuing a wide range of quarry in mixed terrain.

### KRYPTTEK® TYPHON™

Darkness is the ally of the predator that prowls at night. Kryptek® Typhon™ serves those who operate when and where others will not venture.

## FILTER 8™ POLARIZATION

Glare off the water and other light colored surfaces can diminish vision at critical moments and cause eye fatigue.

Wiley X Filter 8™ polarized lenses prevent eye fatigue and diminished vision, which can have critical effects. The Wiley X polarized lenses are better at filtering the light, which ensures unequal clarity and contrast. It is innovative technologies like these that make Wiley X the obvious choice during all water activities, as well as driving.

- Two Slick™ hydrophobic coatings
- Two Selenite™ polycarbonate lenses
- Two T-Shell™ scratch-resistant layers
- One Violet 4™ anti-reflective coating
- Filter 8™ polarized film layer that creates 100% polarization with 100% UV protection

## IMPACT SPEED & TEST ICON DESCRIPTION

### EN.166S TESTED

Frame and lens must withstand the impact of a 22 mm steel ball weighing 43 grams dropped from 1,3 meters at a speed of 18 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

### EN.166F TESTED

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 162 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

### EN.166B TESTED

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 432 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

### HIGH VELOCITY PROTECTION TESTED

Meets ANSI Z87.1 high velocity impact safety and optical standards.

### BALLISTIC TESTED

Meets MIL-PRF-32432 (GL) ballistic standards for spectacles and goggles.

### BALLISTIC TESTED

Meets MIL-PRF-32432A (GL) ballistic standards for spectacles and goggles.

## FEATURES & COATING ICON DESCRIPTION

### FLOATING FACIAL CAVITY™ SEALS

Removable Floating Facial Cavity™ seals block out wind, debris, peripheral light and it floats if you were to drop it while on the water.

### FILTER 8™ POLARIZATION

Our proprietary polarized lens technology adds 100% polarization to 100% ultraviolet protection for unequalled clarity and contrast.

### HYDROPHOBIC COATING

Hydrophobic water repellent coating. Lets the water slide off instead of sticking to the lens. Only on polarized lenses.

### FACIAL CAVITY™ SEALS

Our removable Facial Cavity™ Seals block out wind, debris and peripheral light.

### PRESCRIPTION READY

Wiley X frames can be fit with a custom prescription lens.

### OLEOPHOBIC COATING

Helps to keep dust, dirt and oil from sticking to the lens. Only on CAPTIVATE™ lenses.

### HARD COATING

Scratch resistant coating protects against damage and extends the life of the lens.

### ANTI-REFLECTIVE COATING

Anti-reflective coating eliminates distracting reflections of the lens surfaces. Only on polarized lenses.

### ANTI-FOG COATING

Anti-fog coating prevents misting on the lens in high humidity and temperature differences

### CLICK A.I.R. GASKET

The CLICK A.I.R. gasket allows air to flow through and effectively venting the eyewear, eliminating any fogging issues, and blocking out wind, debris, and peripheral light.

# CAPTIVATE™ POLARIZED LENS OPTION

P O L A R I Z E D

## CAPTIVATE™ POLARIZED GREEN MIRROR LENS

LENS BASE COLOR: COPPER  
LIGHT TRANSMISSION: 12%\*

Ideal for activities with green landscapes, such as hiking or playing golf, or general day driving with high-performance on roads with white lines

## CAPTIVATE™ POLARIZED COPPER LENS

LENS BASE COLOR: COPPER  
LIGHT TRANSMISSION: 17%\*

High-performance on slightly cloudy/overcast days. Heightens contrast/color throughout all environments for a variety of outdoor activities (hiking, biking, golfing, etc.).

## CAPTIVATE™ POLARIZED ROSE GOLD MIRROR LENS

LENS BASE COLOR: GREEN  
LIGHT TRANSMISSION: 13%\*

Reduces glare and heightens greens making this lens perfect for general water activities. Activities with contrasting landscapes highlighting yellows and greens such as hiking or playing golf

## CAPTIVATE™ POLARIZED BRONZE MIRROR LENS

LENS BASE COLOR: COPPER  
LIGHT TRANSMISSION: 15%\*

High-performance on slightly cloudy/overcast days. Any activity with lots of yellow landscapes such as hiking in grasslands.

## CAPTIVATE™ POLARIZED GREY LENS

LENS BASE COLOR: GREY  
LIGHT TRANSMISSION: 15%\*

Heightens contrast/color throughout all environments for a variety of outdoor activities (hiking, biking, golfing, etc.). Comfortable driving lenses that prevent eyestrain. General daytime outdoor activities.

## CAPTIVATE™ POLARIZED BLUE MIRROR LENS

LENS BASE COLOR: GREY  
LIGHT TRANSMISSION: 11%\*

Comfortable driving lenses that prevent eyestrain. General daytime outdoor activities

# FILTER 8™ POLARIZATION LENS OPTION

## POLARIZED PLATINUM FLASH LENS

LENS BASE COLOR: AMBER  
LIGHT TRANSMISSION: 13%\*

On top of green lenses, a multi-coat Z-Oxide mirror is placed, providing maximum glare reduction without distorting the colors. These are great for general daytime use. 100% UVA/UVB protective

## POLARIZED BLUE MIRROR LENS

LENS BASE COLOR: GREEN  
LIGHT TRANSMISSION: 11%\*

Provides a better vision and allows the eyes to feel more comfortable and well rested. The multi-coated green lens absorbs reflections across mirror surfaces and diminish glare. 100% UVA/UVB protective

## POLARIZED GREY LENS

LENS BASE COLOR: GREY  
LIGHT TRANSMISSION: 15%\*

Reduces glare and offers the greatest clarity. Blocking blinding glare, while preserving sharpness. Ideal for first and last light, fishing, hunting, and riding a motorcycle. 100% UVA/UVB protective

Light transmission is the light which reaches the eye after the lens has discarded / absorbed some of the light.  
\*The light transmission varies +/- 3%, depending on the model.

## STANDARD LENS OPTIONS

### CLEAR LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 89%\*

With these lenses you get maximum light transmission, making you see the precise color values. Ideal for hazy or overcast weather, as well as dusk/dawn conditions and indoor use.

### BROWN GRADIENT LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 22%\*

Ideal for everyday use as well as most outdoor activities. It provides a shield for overhead light, while allowing greater visibility at the bottom of the lens.

### SILVER FLASH LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 12%\*

Grey lenses covered with a multi-coated Z-Oxide mirror, which reduces glare and making them excellent on bright days. Absorb all colors equally, preserving the same color perception as without sunglasses.

### VERMILLION LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 45%\*

Performs best in medium to low light conditions. Increases contrast, as they block blue light (HEV), as well as they sharpen contrast and brightens targets.

### LIGHT RUST LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 52%\*

Filter out most blue light waves (HEV), which is the key component of glare and haze. They enhance contrast in medium to low light conditions.

### PURPLE LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 40%\*

Best for use in medium to low-light conditions. The lens sharpens contrast and brightens targets, as the green color is dampened to the max.

### GREY LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 15%\*

Absorbs all colors equally, making them preserve the same color perception as without sunglasses. They are perfect in bright light conditions, ensuring maximum glare reduction.

### BROWN LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 16%\*

Ensure a superior visual definition. They increase contrast and enhance ground level contours in most light conditions.

### COPPER LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 14%\*

Enhances contrast and ensures you superior visual definition in bright sun conditions.

### YELLOW LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: SABER 86% / DETECTION 82%\*

The best light enhancing lens tint. They filter out the blue light (HEV), which may cause glare, and they enhance contrast in low-light, foggy, or overcast conditions.

### ORANGE LENS

100% UVA/UVB PROTECTIVE  
LIGHT TRANSMISSION: 55%\*

Sharpening contrast, dampens green colors, making them perfect on the range or out hunting. With these lenses, your optimal vision is ensured, when used in medium to low-light conditions.

A scenic landscape photograph featuring a range of mountains under a sunset sky. The sun is low on the horizon, casting a warm orange and yellow glow. In the foreground, a saguaro cactus is visible, slightly out of focus. The word "ACTIVE" is overlaid in large, white, bold, sans-serif capital letters, centered horizontally and partially overlapping the mountain peaks.

# ACTIVE

---

The top choice for outdoor enthusiasts due to their sleek designs, crystal clear optics, and ultimate protection. This series is built for pushing limits and pursuing every adventure.

# CHANGEABLE

---

The most versatile eyewear in our entire collection. Each frame is designed to allow the lenses to be easily removed and replaced so wearers can adapt to any lighting condition.

## THE SECRET BEHIND

The picture is showing a Saber Advanced lens, which has been shot from only 10 meters distance using a 12 gauge shotgun with Modified Choke and shooting with steel shot size #7. As the picture shows, the lens was hit by multiple pellets – no cracks or penetration on the back of the lens leaving the eyes intact and protected.

## 360° NOSE PIECE

A wire core makes this nose piece fully adjustable. Specially developed rubber on top of the wire core guarantees a superior grip during almost any activity. The rubber is also very robust and so comfortable that the glasses can be worn all day without any discomfort.

- Prepared to hold the Wiley X PTX prescription insert
- Adjustable to all nose shapes and sizes
- Specially developed rubber coating for superior grip and high comfort

## COMM TEMPLE SYSTEM

Our COMM TEMPLES are thin enough to fit under shooting earmuffs, and other ear mounted communication devices providing a comfortable fit. Almost unnoticeable, these slim temples prevent irritation that you may experience with other eyewear. Available on selected models.

REGULAR TEMPLES

COMM TEMPLES

## WILEY X PRESCRIPTION INSERT

If you need prescription lenses, choosing a Wiley X model with an prescription insert provides you with the following advantages compared to models where the prescription lenses are built directly into the frame (full frame design).

- Easy and cheaper to replace an outer lens which has no prescription
- Up to 5 different front lens color options – allowing you to adjust to any given light condition
- Everyone can use the eyewear without the insert
- Still tested as safety eyewear
- Inserts match different models (see below)

The PTX prescription insert can be used in the following models:

- Saber Advanced
- Rouge Comm
- Nerve

The Twist Lock prescription insert (TLRX) can be used in the following models:

- WX Vapor, WX Vapor Comm
- Spear and Spear Dual

# CLIMATE CONTROL

---

Designed to protect your eyes from the elements during high-speed activities, wearers can be sure that even the finest dust and dirt will stay out of their eyes.

## FACIAL CAVITY™ SEALS

Fine dust and pollen, as well as wind, can cause long-term eye irritation such as Dry Eye Syndrome. Peripheral light can also diminish optical clarity. Wiley X removable soft foam Facial Cavity™ Seals combined with Top Down™ Ventilation System block out even the finest irritants and peripheral light, protecting the eyes and allowing all lenses to perform at peak levels. Facial Cavity™ Seals are available on selected styles.

### DRY EYE SYNDROME

Dry eyes are a result of decreased tear production or change in the tear film's consistency resulting in tears evaporating quicker. In both cases, the tear film is reduced and does not cover the entire surface of the eye, which can cause irritation and itchiness.

Protecting your eyes while participating in activities that expose you to wind, dust and other debris is crucial in preventing dry eyes that can result in Dry Eye Syndrome. The Wiley X Facial Cavity™ Seal and the base curve of all Wiley X frames help minimize the airflow around the eye, allowing the user to focus on the challenge at hand.

## FLOATING FACIAL CAVITY™ SEALS

Comfortable, removable, and durable Floating Facial Cavity™ Seals easily clip into Wiley X's innovative Climate Control series eyewear. This unique performance technology prevents your glasses from sinking as well as shields your eyes from harmful and disturbing outside elements like wind, peripheral light, dust, and debris. Floating Facial Cavity™ Seals are available on selected styles.

## CLICK A.I.R. GASKET SYSTEM

With the Click A.I.R. gasket technology, Wiley X offers new possibilities and advantages. Like our regular foam gaskets, the CLICK A.I.R. gasket is designed to protect the eyes from irritants like dust and wind, by creating an effective foam barrier. However, with this design's enhancements, the barrier can be unsealed to allow airflow. By a click of a button, the CLICK A.I.R. gasket (A.I.R. = Air Intake Regulation) is opened, allowing air to flow through the gasket and effectively venting the glasses and eliminating any fogging issues. Click open the ventilation or close for an airtight seal – the choice is yours.

# GOGGLES

---

Build to adapt to ever-changing environments, Wiley X goggles provide exceptional protection in any condition. Ensuring that all adventurous people are equipped with the best possible protective gear when exploring nature.

## DUAL GOGGLE LENS

### WX DUAL TECHNOLOGY

Two layer lens

### ORDINARY LENS

One layer lens

The DUAL Lens Technology used in the Wiley X goggles secures a free view in all extreme weather and temperature conditions. Typically with standard goggles the outside area usually is warmer causing the lens to fog. With the Wiley X DUAL Lens technology, the integrated thermal bridge between the two lens layers separates cold and warm air preventing temperature differences that would result in fogging.

# DIGITAL PRESCRIPTION LENS CUTTING

---

To ensure that we can deliver premium protective prescription eyewear, we've teamed up with high base curve prescription lens experts and manufacturer, Shamir.

Our partnership with Shamir ensures that the majority of all Wiley X models can be fitted with customized prescription lenses. Shamir's digital prescription lens cutting techniques allow us to provide our customers with a wide range of prescription levels.

## PRESCRIPTION LENSES

The majority of all the Wiley X frames can be fitted with prescription lenses. As our professional prescription lens partner, we have chosen Shamir, whose Attitude™ lenses are specifically developed for our 8-base curve frames. The result is individually customized lenses that offer crystal clear vision in any given situation, while providing the same crucial protection as the non-prescription lenses developed by Wiley X.

The prescription program enables simple ordering and delivery of single vision and progressive corrective lenses through your nearest optician.

## POLYCARBONATE LENSES

To meet the stringent worldwide safety eyewear standards, Wiley X uses the lens material called polycarbonate. The flexibility and strength of polycarbonate enables it to stop the impact from a 12 gauge shotgun or fragments from an IED (Improvised Explosive Device). Wiley X applies anti-scratch coatings on all lenses to increase the lifetime and maintain a top of the line product.

## PERFORMANCE MARKINGS

All Wiley X styles are ANSI rated and EN.166 tested protective eyewear. We test and mark all of our frames and lenses with the appropriate ANSI and EN.166 markings.

### EN.166 STANDARD MARKINGS

- EN.166(S) – Spectacles with increased robustness tests
- EN.166(F) – Spectacles with low energy impact tests
- EN.166(B) – Goggles with medium energy impact tests

### ANSI STANDARDS

WX Z87-1 – The frame and temples or goggle frame passes the ANSI high velocity and high impact standards.

WX Z87-2 – The frame and temples or goggle frame passes the ANSI high velocity and high impact standards, and it can be fitted with prescription lenses.

### ANSI STANDARD MARKINGS

- WX Precedes all ANSI rating marks. Wiley X is the manufacturer.
- Z87 The frame and temples or goggle frame passes the ANSI high velocity and high impact test.
- 2 The frame can be fitted with a prescription lens, which is the case with almost all Wiley X glasses.
- + The frame and temples or goggle frame passes the ANSI high velocity and high impact test (2010 standard).
- + The lens meets or exceeds the ANSI High Velocity Impact standard.
- S The lens is a filter or shaded lens (not clear).
- V The lens is variable-tint photochromic (light adjusting).

## POLYCARBONATE PRESCRIPTION INFORMATION

Wiley X sports glasses can be fitted with customized prescription lenses, so you can enjoy your favorite activities and extreme sports without impaired vision.

Wiley X mostly use Shamir polycarbonate lenses for prescription jobs, due to Shamir's unique safety lens collection developed for wraparound sports frames. This optical design compensates for the high base curve of the lens, which minimizes side distortion on both single vision and progressive lenses. Furthermore, you get the same safety standards as the Wiley X non-prescription eyewear.

The Shamir lenses are available in many colors and with different features like transition (light adjusting) and polarization. A number of special coatings and mirrors can be added, but the lenses always come with improved scratch-resistant coating. The majority of all Wiley X frames can be fitted with prescription lenses – ask your local optician for further information or go to [www.wileyx.eu](http://www.wileyx.eu) and explore the vast possibilities.

### ATTENTION:

- All prescription lenses are delivered with a minimum thickness of 2,2 mm +/- 10% to comply with the EN. 166 safety standards.
- Be aware of the combination of a small pupil distance and a large lens diameter.
- All parameters apply single vision lenses.
